August 13, 2021

**Author's Note:** The FactSet Earnings Insight report will not be published on August 20 or August 27. The next edition of the report will be published on September 3.

## Key Metrics

- **Earnings Scorecard:** For Q2 2021 (with 91% of S&P 500 companies reporting actual results), 87% of S&P 500 companies have reported a positive EPS surprise and 87% of S&P 500 companies have reported a positive revenue surprise.
- **Earnings Growth:** For Q2 2021, the blended earnings growth rate for the S&P 500 is 89.3%. If 89.3% is the actual growth rate for the quarter, it will mark the highest year-over-year earnings growth rate reported by the index since Q4 2009 (109.1%).
- **Earnings Guidance:** For Q3 2021, 31 S&P 500 companies have issued negative EPS guidance and 42 S&P 500 companies have issued positive EPS guidance.
- **Valuation:** The forward 12-month P/E ratio for the S&P 500 is 21.1. This P/E ratio is above the 5-year average (18.2) and above the 10-year average (16.3).

## Topic of the Week:

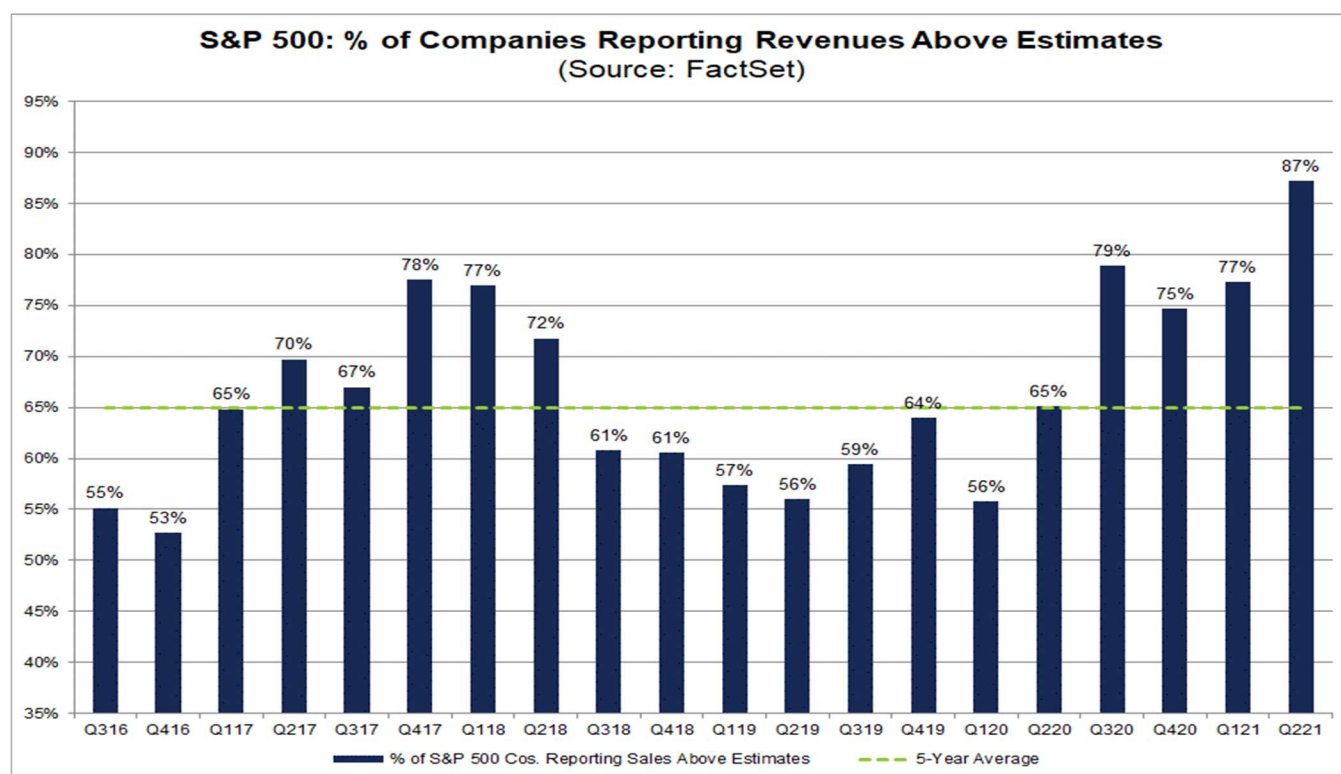

### S&P 500 Companies Report Record-Breaking Performance vs. Revenue Estimates in Q2

As of today, 91% of the companies in the S&P 500 have reported actual revenue numbers for the second quarter. Of these companies, 87% reported actual revenues above the mean revenue estimate and 13% reported actual revenues below the mean revenue estimate. In aggregate, these companies reported revenues that were 4.9% above expectations. How do these percentages compare to recent averages?

The percentage of companies that have reported revenues above estimates for Q2 2021 is above both the trailing 1-year average (74%) and the trailing 5-year average (65%). In fact, the second quarter will mark the highest percentage of S&P 500 companies reporting revenues above estimates for a quarter since FactSet began tracking this metric in 2008. The previous record was 79%, which occurred in Q3 2020. At the sector level, the Health Care (97%), Communication Services (96%) and Information Technology (95%) sectors have the highest percentages of companies reporting revenue above estimates.

The revenue surprise percentage for Q2 2021 of 4.9% is also above the trailing 1-year average (+2.8%) and the trailing 5-year average (1.2%). In fact, the second quarter will mark the highest revenue surprise percentage since FactSet began tracking this metric in 2008. The previous record was 3.8%, which occurred in Q1 2021. At the sector level, the Energy (+11.8%), Communication Services (+5.6%), Consumer Staples (+5.3%), and Information Technology (+5.3%) sectors are reporting the largest differences between actual revenues and estimated revenues.

It is important to note that S&P 500 companies are beating revenue estimates for Q2 that analysts increased during the course of second quarter. On March 31, the estimated revenue growth rate for the S&P 500 for Q2 2021 was 16.6%. By June 30, the estimated revenue growth rate for Q2 had increased to 19.4%, as analysts raised revenue estimates for S&P 500 companies during the quarter. Due to both the unusually high number and magnitude of positive revenue surprises reported by S&P 500 companies during the Q2 earnings season, the revenue growth rate for Q2 is 24.9% today. In fact, the second quarter will mark the highest (year-over-year) revenue growth rate reported by the index since FactSet began tracking this metric in 2008. Please see our recent Insight article for more details: <https://insight.factset.com/sp-500-is-reporting-highest-revenue-growth-in-at-least-13-years>

## Q2 Earnings Season: By The Numbers

### Overview

At this point in time, more S&P 500 companies are beating EPS estimates for the second quarter than average, and beating EPS estimates by a wider margin than average. As a result, the index is reporting higher earnings for the second quarter today relative to the end of last week and relative to the end of the quarter. The index is currently reporting the highest year-over-year growth in earnings since Q4 2009. Analysts expect earnings growth of more than 20% for the second half of 2021. These above-average growth rates are due to a combination of higher earnings for 2021 and an easier comparison to weaker earnings in 2020 due to the negative impact of COVID-19 on a number of industries.

Overall, 91% of the companies in the S&P 500 have reported actual results for Q2 2021 to date. Of these companies, 87% have reported actual EPS above estimates, which is above the 5-year average of 75%. If 87% is the final percentage for the quarter, it will mark the highest percentage of S&P 500 companies reporting a positive EPS surprise since FactSet began tracking this metric in 2008. In aggregate, companies are reporting earnings that are 17.0% above estimates, which is also above the 5-year average of 7.8%. If 17.0% is the final percentage for the quarter, it will mark the fourth-largest earnings surprise percentage reported by the index since FactSet began tracking this metric in 2008.

Due to the number and magnitude of these positive EPS surprises, the index is reporting higher earnings for the second quarter today relative to the end of last week and relative to the end of the second quarter. The blended (combines actual results for companies that have reported and estimated results for companies that have yet to report) earnings growth rate for the second quarter is 89.3% today, compared to an earnings growth rate of 88.7% last week and an earnings growth rate of 63.0% at the end of the second quarter (June 30). Positive earnings surprises reported by companies in multiple sectors were responsible for the small improvement in overall earnings for the index during the past week. Positive earnings surprises reported by companies in the Financials, Information Technology, and Communication Services sectors have been the largest contributors to the overall increase in earnings for the index since the end of the second quarter.

If 89.3% is the actual growth rate for the quarter, it will mark the highest year-over-year earnings growth reported by the index since Q4 2009 (109.1%). The unusually high growth rate is due to a combination of higher earnings in Q2 2021 and an easier comparison to lower earnings in Q2 2020 due to the negative impact of COVID-19 on a number of industries. All eleven sectors are reporting (or have reported) year-over-year earnings growth, led by the Energy, Industrials, Financials, Consumer Discretionary, and Materials sectors.

In terms of revenues, 87% of S&P 500 companies have reported actual revenues above estimates, which is above the 5-year average of 65%. If 87% is the final percentage for the quarter, it will mark the highest percentage of S&P 500 companies reporting a positive revenue surprise since FactSet began tracking this metric in 2008. In aggregate, companies are reporting revenues that are 4.9% above the estimates, which is also above the 5-year average of 1.2%. If 4.9% is the final percentage for the quarter, it will mark the largest revenue surprise percentage reported by the index since FactSet began tracking this metric in 2008.

Due to the number and magnitude of these positive revenue surprises, the blended revenue growth rate for the second quarter is higher now relative to the end of last week and relative to the end of the second quarter. As of today, the S&P 500 is reporting year-over-year growth in revenues of 24.9%, compared to year-over-year growth in revenues of 24.6% last week and year-over-year growth in revenues of 19.4% at the end of the second quarter (June 30). Positive revenue surprises reported by companies in multiple sectors were responsible for the small increase in overall revenues for the index over the past week. Positive revenue surprises reported by companies in the Energy, Financials, Health Care, and Communication Services sectors have been the largest contributors to the increase in overall revenues for the index since the end of the second quarter.

If 24.9% is the actual growth rate for the quarter, it will mark the highest year-over-year revenue growth rate reported by the index since FactSet began tracking this metric in 2008. All eleven sectors are reporting (or have reported) year-over-year growth in revenues, led by the Energy, Materials, and Consumer Discretionary sectors.

Looking at future quarters, analysts expect earnings growth of more than 20% for the remaining two quarters of 2021.

The forward 12-month P/E ratio is 21.1, which is above the 5-year average and above the 10-year average.

During the upcoming week, 19 S&P 500 companies (including three Dow 30 components) are scheduled to report results for the second quarter.

## Scorecard: Companies Reporting Record or Near-Record Performances vs. Estimates

### Percentage of Companies Beating EPS Estimates (87%) is at Record-High Level

Overall, 91% of the companies in the S&P 500 have reported earnings to date for the second quarter. Of these companies, 87% have reported actual EPS above the mean EPS estimate, 3% have reported actual EPS equal to the mean EPS estimate, and 11% have reported actual EPS below the mean EPS estimate. The percentage of companies reporting EPS above the mean EPS estimate is above the 1-year (83%) average and above the 5-year (75%) average.

If 87% is the final percentage for the quarter, it will mark the highest percentage of S&P 500 companies reporting a positive EPS surprise since FactSet began tracking this metric in 2008. The current record is 86%, which occurred in Q1 2021.

At the sector level, the Communication Services (96%) and Information Technology (95%) sectors have the highest percentages of companies reporting earnings above estimates, while the Utilities (71%) and Materials (74%) sectors have the lowest percentages of companies reporting earnings above estimates.

### Earnings Surprise Percentage (+17.0%) is Near Record-High Level

In aggregate, companies are reporting earnings that are 17.0% above expectations. This surprise percentage is below the 1-year (+19.7%) average but above the 5-year (+7.8%) average.

If 17.0% is the final percentage for the quarter, it will mark the fourth-largest earnings surprise percentage reported by the index since FactSet began tracking this metric in 2008. The current record is 23.1%, which occurred in Q2 2020.

The Consumer Discretionary (+30.8%) sector is reporting the largest positive (aggregate) difference between actual earnings and estimated earnings. Within this sector, Caesars Entertainment (\$0.48 vs. -\$0.05), Ford Motor (\$0.13 vs. -\$0.03), Under Armour (\$0.24 vs. \$0.06), Ralph Lauren (\$2.29 vs. \$0.88), V.F. Corporation (\$0.27 vs. \$0.11), and Hasbro (\$1.05 vs. \$0.47) have reported some of the largest positive EPS surprises.

The Financials (+26.9%) sector reported the second-largest positive (aggregate) difference between actual earnings and estimated earnings. Within this sector, PNC Financial Services Group (\$2.43 vs. \$1.09), Cincinnati Financial Corporation (\$1.79 vs. \$0.99), Hartford Financial Services Group (\$2.33 vs. \$1.34), and American Express (\$2.80 vs. \$1.63) reported some of the largest positive EPS surprises.

The Communication Services (+24.1%) sector reported the third-largest positive (aggregate) difference between actual earnings and estimated earnings. Within this sector, News Corporation (\$0.16 vs. \$0.06), Twitter (\$0.20 vs. \$0.07), Interpublic Group of Companies (\$0.70 vs. \$0.44), T-Mobile (\$0.78 vs. \$0.51), Walt Disney (\$0.80 vs. \$0.55), and Alphabet (\$27.26 vs. \$19.33) reported some of the largest positive EPS surprises.

### Market Rewarding Positive Earnings Surprises More Than Average

To date, the market is rewarding positive earnings surprises more than average and punishing negative earnings surprises less than average.

Companies that have reported positive earnings surprises for Q2 2021 have seen an average price increase of +1.2% two days before the earnings release through two days after the earnings release. This percentage increase is larger than the 5-year average price increase of +0.8% during this same window for companies reporting positive earnings surprises.

Companies that have reported negative earnings surprises for Q2 2021 have seen an average price decrease of -1.4% two days before the earnings release through two days after the earnings. This percentage decrease is smaller than the 5-year average price decrease of -2.4% during this same window for companies reporting negative earnings surprises.

### Percentage of Companies Beating Revenue Estimates (87%) is at Record-High Level

In terms of revenues, 87% of companies have reported actual revenues above estimated revenues and 13% have reported actual revenues below estimated revenues. The percentage of companies reporting revenues above estimates is above the 1-year average (74%) and above the 5-year average (65%).

If 87% is the final percentage for the quarter, it will mark the highest percentage of S&P 500 companies reporting a positive revenue surprise since FactSet began tracking this metric in 2008. The current record is 79%, which occurred in Q3 2020.

At the sector level, the Health Care (97%), Communication Services (96%), and Information Technology (95%) sectors have the highest percentages of companies reporting revenues above estimates, while the Materials (67%) and Utilities (68%) sectors have the lowest percentages of companies reporting revenues above estimates.

### Revenue Surprise Percentage (+4.9%) is at Record-High Level

In aggregate, companies are reporting revenues that are 4.9% above expectations. This surprise percentage is above the 1-year (+2.8%) average and above the 5-year (+1.2%) average.

If 4.9% is the final percentage for the quarter, it will mark the largest revenue surprise percentage reported by the index since FactSet began tracking this metric in 2008. The current record is 3.8%, which occurred in Q1 2021.

At the sector level, the Energy (+11.8%), Communication Services (+5.6%), Consumer Staples (5.3%), and Information Technology (+5.3%) sectors are reporting the largest positive (aggregate) differences between actual revenues and estimated revenues, while the Industrials (+2.3%) sector is reporting the smallest positive (aggregate) difference between actual revenues and estimated revenues.

## Revisions: Increase in Earnings Growth Since June 30 Led By Financials

### Small Increase in Blended Earnings Growth Rate This Week

The blended (year-over-year) earnings growth rate for the second quarter is 89.3%, which is larger than the earnings growth rate of 88.7% last week. Positive earnings surprises reported by companies in multiple sectors were responsible for the small increase in the overall earnings growth rate for the index during the week.

### Small Increase in Blended Revenue Growth This Week

The blended (year-over-year) revenue growth rate for the second quarter is 24.9%, which is larger than the revenue growth rate of 24.6% last week. Positive revenue surprises reported by companies in multiple sectors were responsible for the small increase in overall revenues for the index over the past week.

### Financials Sector Has Seen Largest Increase in Earnings since June 30

The blended (year-over-year) earnings growth rate for Q2 2021 of 89.3% is larger than the estimate of 63.0% at the end of the second quarter (June 30). Ten sectors have recorded an increase in their earnings growth rate since the end of the quarter due to upward revisions to earnings estimates and positive earnings surprises, led by the Consumer Discretionary (to 269.8% from 204.3%), Industrials (to 409.4% from 347.5%), and Financials (to 176.8% from 115.2%) sectors. However, the Financials, Information Technology, and Communication Services sectors have seen the largest increases in dollar-level earnings of all eleven sectors since June 30.

In the Financials sector, the positive EPS surprises reported by Bank of America (\$1.03 vs. \$0.77), JPMorgan Chase (\$3.78 vs \$3.20), Goldman Sachs (\$15.02 vs. \$10.26), Wells Fargo (\$1.38 vs. \$0.98), Citigroup (\$2.85 vs. \$1.97), and Capital One Financial (\$7.71 vs. \$4.62) have been substantial contributors to the increase in earnings for the index since June 30. As a result, the blended earnings growth rate for the Financials sector has increased to 176.8% from 115.2% over this period.

In the Information Technology sector, the positive EPS surprises reported by Apple (\$1.30 vs. \$1.01) and Microsoft (\$2.17 vs \$1.92) have been significant contributors to the increase in earnings for the index since June 30. As a result, the blended earnings growth rate for the Information Technology sector has increased to 46.6% from 30.5% over this period.

In the Communication Services sector, the positive EPS surprises reported by Alphabet (\$27.26 vs. \$19.33) and Facebook (\$3.61 vs \$3.04) have been substantial contributors to the increase in earnings for the index since June 30. As a result, the blended earnings growth rate for the Communication Services sector has increased to 75.8% from 40.9% over this period.

### Energy Sector Has Seen Largest Increase in Revenues since June 30

The blended (year-over-year) revenue growth rate for Q2 2021 of 24.9% is larger than the estimate of 19.4% at the end of the second quarter (June 30). All eleven sectors have recorded an increase in revenue growth since the end of the quarter due to upward revisions to revenue estimates and positive revenue surprises, led by the Energy (113.3% from 86.6%) sector. This sector has also seen the largest increase in dollar-level revenues of all eleven sectors since June 30.

### Earnings Growth: 89.3%

The blended (year-over-year) earnings growth rate for Q2 2021 is 89.3%, which is well above the 5-year average earnings growth rate of 7.1%. If 89.3% is the actual growth rate for the quarter, it will mark the highest year-over-year earnings growth reported by the index since Q4 2009 (109.1%). The unusually high growth rate is due to a combination of higher earnings in Q2 2021 and an easier comparison to lower earnings in Q2 2020 due to the negative impact of COVID-19 on a number of industries. All eleven sectors are reporting (or have reported) year-over-year earnings growth, led by the Energy, Industrials, Consumer Discretionary, Financials, and Materials sectors.

### Energy: Exxon Mobil and Chevron Were Largest Contributors to Higher Year-Over-Year Earnings

The Energy sector reported earnings of \$15.9 billion for Q2 2021 compared to a loss of -\$10.6 billion in Q2 2020. Thus, a year-over-year growth rate was not calculated for the Energy sector due to the loss reported by the sector in Q2 2020. Higher year-over-year oil prices contributed to the year-over-year improvement in earnings for this sector, as the average price of oil in Q2 2021 (\$66.17) was 136% above the average price for oil in Q2 2020 (\$28.00). At the sub-industry level, all five sub-industries in the sector reported a year-over-year increase in earnings. A growth rate was not calculated for three of these five sub-industries due to losses reported in the year-ago quarter. However, all three reported profits in Q2 2021: Integrated Oil & Gas, Oil & Gas Exploration & Production, and Oil & Gas Refining & Marketing. The other two sub-industries that reported year-over-year growth are the Oil & Gas Equipment & Services (1,381%) and Oil & Gas Storage & Transportation (44%) sub-industries. At the company level, Exxon Mobil and Chevron were the largest contributors to the year-over-year improvement in earnings for the sector. Combined, these two companies accounted for \$13.9 billion of the \$26.8 billion year-over-year increase in earnings for the sector.

### Industrials: Airlines Industry is Largest Contributor to Year-Over-Year Growth

The Industrials sector is reporting to the highest (year-over-year) earnings growth rate of all eleven sectors at 409.4%. At the industry level, all 12 industries in the sector are reporting (or have reported) a year-over-year increase in earnings. A growth rate was not calculated for the Airlines industry due to the loss reported in the year-ago quarter. However, this industry reported a smaller loss in Q2 2021 (-\$3.3 billion) relative to Q2 2020 (-\$11.5 billion). The remaining eleven industries are all reporting (or have reported) double-digit earnings growth. Six of these eleven industries are reporting (or have reported) earnings growth of more than 60%: Industrial Conglomerates (313%), Aerospace & Defense (222%), Machinery (94%), Road & Rail (72%), Electrical Equipment (71%), and Air Freight & Logistics (63%). The Airlines industry is also the largest contributor to earnings growth for the sector. If this industry were excluded, the blended earnings growth rate for the Industrials sector would fall to 95.4% from 409.4%.

### Consumer Discretionary: Hotels, Restaurants & Leisure Industry Is Largest Contributor to Growth

The Consumer Discretionary sector is reporting the second-highest (year-over-year) earnings growth rate of all eleven sectors at 269.8%. At the industry level, nine of the ten industries in this sector are reporting (or have reported) a year-over-year improvement in earnings. A growth rate is not being calculated for four of these nine industries due to losses reported in the year-ago quarter. However, all four industries are reporting (or have reported) profits in Q2 2021: Automobiles, Textiles, Apparel & Luxury Goods, Auto Components, and Hotels, Restaurants, & Leisure. The other five industries are reporting (or have reported) double-digit earnings growth: Leisure Products (5,171%), Household Durables (94%), Distributors (67%), Internet & Direct Marketing Retail (41%), and Specialty Retail (33%). The only industry expected to report a year-over-year decline in earnings is the Multiline Retail (-6%) industry. The Hotels, Restaurants, & Leisure industry is also the largest contributor to earnings growth for the sector, as this industry reported a profit of \$158 million in Q2 2021 compared to a loss of \$7.7 billion in Q2 2020. If this industry were excluded, the blended earnings growth rate for the Consumer Discretionary sector would fall to 103.1% from 269.8%.

### Financials: Banks Industry Was Largest Contributor to Year-Over-Year Growth

The Financials sector reported the third-highest (year-over-year) earnings growth rate of all eleven sectors at 176.8%. At the industry level, all five industries in this sector reported a year-over-year improvement in earnings. A growth rate was not calculated for the Consumer Finance industry due to a loss reported in the year-ago quarter. However, this industry reported a profit in Q2 2021 (\$8.6 billion) relative to the loss in Q2 2020 (-\$832 million). The other four industries reported earnings growth of more than 20%: Banks (417%), Insurance (99%), Capital Markets (41%), and Diversified Financial Services (23%). The Banks industry was also the largest contributor to growth for the sector. If this industry were excluded, the blended earnings growth rate for the Financials sector would fall to 98.1% from 176.8%.

### Materials: Metals & Mining Industry Is Largest Contributor to Year-Over-Year Growth

The Materials sector is reporting the fourth-highest (year-over-year) earnings growth rate of all eleven sectors at 135.0%. At the industry level, all four industries in this sector are reporting (or have reported) year-over-year growth. Two of these four industries reported growth of more than 100%: Metals & Mining (715%) and Chemicals (131%). The Metals & Mining industry is also the largest contributor to year-over-year growth in earnings for the sector. If this industry were excluded, the blended earnings growth rate for the Materials sector would fall to 100.2% from 135.0%.

### Revenue Growth: 24.9%

The blended (year-over-year) revenue growth rate for Q2 2021 is 24.9%, which is well above the 5-year average revenue growth rate of 4.5%. If 24.9% is the actual growth rate for the quarter, it will mark the highest year-over-year revenue growth reported by the index since FactSet began tracking this metric in 2008. The current record is 12.7%, which occurred in Q2 2011. The unusually high growth rate is due to a combination of higher revenues in Q2 2021 and an easier comparison to lower revenues in Q2 2020 due to the negative impact of COVID-19 on a number of industries. All eleven sectors are reporting (or have reported) year-over-year growth in revenues, led by the Energy, Materials, and Consumer Discretionary sectors.

### Energy: 3 of 5 Sub-Industries Reported Year-Over-Year Growth Above 125%

The Energy sector reported the highest (year-over-year) revenue growth rate of all eleven sectors at 113.3%. Higher year-over-year oil prices contributed to the year-over-year improvement in revenues for this sector, as the average price of oil in Q2 2021 (\$66.17) was 136% above the average price for oil in Q2 2020 (\$28.00). At the sub-industry level, all five sub-industries in the sector reported year-over-year growth in revenues. Three of these five sub-industries reported revenue growth above 125%: Oil & Gas Exploration & Production (193%), Oil & Gas Refining & Marketing (129%), and Integrated Oil & Gas (127%).

### Materials: Metals & Mining Industry Leads Year-Over-Year Growth

The Materials sector is reporting the second-highest (year-over-year) revenue growth of all eleven sectors at 37.9%. At the industry level, all four industries in this sector are reporting (or have reported) year-over-year growth in revenues, with three of these four industries reporting double-digit growth: Metals & Mining (81%), Chemicals (39%), and Containers & Packaging (17%).

### Consumer Discretionary: 5 of 10 Industries Reporting Year-Over-Year Growth Above 50%

The Consumer Discretionary sector is reporting the third-highest (year-over-year) revenue growth of all eleven sectors at 34.3%. At the industry level, all ten industries in this sector are reporting (or have reported) growth in revenues. Nine of these ten industries are reporting (or have reported) double-digit growth, with five of these nine industries reporting earnings growth above 50%: Auto Components (123%), Hotels, Restaurants, & Leisure (111%), Textiles, Apparel, & Luxury Goods (81%), Automobiles (73%), and Leisure Products (54%).

### Net Profit Margin: 13.0%

The blended net profit margin for the S&P 500 for Q2 2021 is 13.0%, which is above the 5-year average of 10.6%, above the year-ago net profit margin of 8.6%, and above the previous quarter's net profit margin of 12.8%.

If 13.0% is the actual net profit margin for the quarter, it will mark the highest net profit margin reported by the index since FactSet began tracking this metric in 2008. The current record is 12.8%, which occurred in the previous quarter.

At the sector level, all eleven sectors are reporting (or have reported) a year-over-year increase in their net profit margins in Q2 2021 compared to Q2 2020, led by the Financials sector (21.5% vs. 8.6%), Industrials (9.0% vs. 2.3%), and Materials (14.7% vs. 8.6%) sectors. Ten sectors are reporting net profit margins in Q2 2021 that are above their 5-year averages, led by the Financials (21.5% vs. 15.5%) and Materials (14.7% vs. 9.3%) sectors.

## Looking Ahead: Forward Estimates and Valuation

### Guidance: Above-Average % of S&P 500 Companies Issuing Positive EPS Guidance for Q3

At this point in time, 73 companies in the index have issued EPS guidance for Q3 2021. Of these 73 companies, 31 have issued negative EPS guidance and 42 have issued positive EPS guidance. The percentage of companies issuing positive EPS guidance is 58% (42 out of 73), which is well above the 5-year average of 37%.

The term “guidance” (or “preannouncement”) is defined as a projection or estimate for EPS provided by a company in advance of the company reporting actual results. Guidance is classified as negative if the estimate (or mid-point of a range estimates) provided by a company is lower than the mean EPS estimate the day before the guidance was issued. Guidance is classified as positive if the estimate (or mid-point of a range of estimates) provided by the company is higher than the mean EPS estimate the day before the guidance was issued.

### Earnings: S&P 500 Expected to Report Earnings Growth of 42% for CY 2021

For the second quarter, S&P 500 companies are reporting earnings growth of 89.3% and revenue growth of 24.9%.

For Q3 2021, analysts are projecting earnings growth of 27.8% and revenue growth of 14.5%.

For Q4 2021, analysts are projecting earnings growth of 21.3% and revenue growth of 11.0%.

For CY 2021, analysts are projecting earnings growth of 41.9% and revenue growth of 14.5%.

For CY 2022, analysts are projecting earnings growth of 9.4% and revenue growth of 6.5%.

### Valuation: Forward P/E Ratio is 21.1, Above the 10-Year Average (16.3)

The forward 12-month P/E ratio is 21.1. This P/E ratio is above the 5-year average of 18.2 and above the 10-year average of 16.3. However, it is slightly below the forward 12-month P/E ratio of 21.4 recorded at the end of the second quarter (June 30). Since the end of the second quarter (June 30), the price of the index has increased by 3.8%, while the forward 12-month EPS estimate has increased by 4.9%.

At the sector level, the Consumer Discretionary (30.8) and Information Technology (26.3) sectors have the highest forward 12-month P/E ratios, while the Energy (13.6) and Financials (14.4) sectors have the lowest forward 12-month P/E ratios.

### Targets & Ratings: Analysts Project 11% Increase in Price Over Next 12 Months

The bottom-up target price for the S&P 500 is 4966.47, which is 11.3% above the closing price of 4460.83. At the sector level, the Energy (+22.9%) sector is expected to see the largest price increase, as this sector has the largest upside difference between the bottom-up target price and the closing price. On the other hand, the Utilities (+6.2%) and Financials (+6.7%) sectors are expected to see the smallest price increases, as these sectors have the smallest upside differences between the bottom-up target price and the closing price.

Overall, there are 10,506 ratings on stocks in the S&P 500. Of these 10,506 ratings, 57.1% are Buy ratings, 36.6% are Hold ratings, and 6.4% are Sell ratings. At the sector level, the Energy (65%), Health Care (63%), Communication Services (63%), and Information Technology (62%) sectors have the highest percentages of Buy ratings, while the Consumer Staples (43%) sector has the lowest percentage of Buy ratings.

### Companies Reporting Next Week: 19
