

FactSet Sustainability Statement

Our approach to sustainably managing our own business operations is evolving. We intend to work toward benchmarking certain environmental performance measurements, and set targets to increase our sustainability practices. We already work with our landlords and suppliers to address sustainability concerns.

Our Commitments

- We will govern our environmental sustainability at an appropriate level with oversight from the Executive Vice President, Strategic Resources and General Counsel and the Senior Vice President of Corporate Social Responsibility
- We will review our environmental performance measurements and work towards implementing an environmental management system
- We plan to measure our carbon footprint to establish a baseline and more fully assess and determine appropriate next steps regarding future measuring and reporting, and target reductions if applicable
- We plan to evaluate programs to assess our current efforts and further determine the extent of our capability to measure our waste, and where possible incorporate reduction, re-use and recycling measures within our business operations
- When leasing new real estate and offices, we will strive to have our buildings meet, or preferably exceed, our efficiency and sustainability standards
- We will work with our suppliers to encourage them to manage their own operations in a responsible and sustainable manner.
- We will use commercially reasonable efforts to comply with all material applicable environmental legislation in our office locations

To track our progress:

- The Executive Vice President, Strategic Resources and General Counsel and the Senior Vice President of Corporate Social Responsibility will report our progress to the Board periodically;
- We expect to report our progress in our annual CSR Report;
- We will engage our employees in our commitment to environmental sustainability; and
- We will review this sustainability statement regularly.

Effective: October 1, 2018
